

Alzheimer's Research and Clinical Trials

A worldwide quest is under way to find treatments to stop, slow or even prevent Alzheimer's disease. Some of the most promising research is happening right here in San Diego. There are a number of local trials that are in great need of volunteers to continue the important work of finding a treatment or cure! For more information, contact the research institution directly or call Alzheimer's San Diego at 858-492-4400.

Research Institution	Current Studies Enrolling Participants <i>(as of 12/1/16)</i>
<p>*Sharp Healthcare Clinical Research</p> <p>7850 Vista Hill Ave San Diego, 92123</p>	<p>Navigate Study: The purpose of this study is to see if the drug LY3202626 slows the progression of Alzheimer's.</p> <p>Neurim NEUP11-AD2: The purpose of this study is to see if the drug Piromelatine slows the progression of Alzheimer's</p> <p>Daybreak Study: The purpose of this study is to see if the drug LY3314814 slows the progression of Alzheimer's.</p> <p>Prodromal Alzheimer's: The purpose of this study is to see if drug Solanezumab slows the progression of Alzheimer's</p> <p style="text-align: center;"><i>For more information call 858-836-8350 or visit www.sharp.com/hospitals/mesa-vista</i></p>
<p>*Synergy Research Centers</p> <p>7922 Palm St, Lemon Grove, 91945 1908 Sweetwater Rd National City, 91950</p>	<p>Alzheimer's and Agitation: A study for people with Alzheimer's who have agitation. Participants can remain on current Alzheimer's medication and will be given the study medication or placebo for treatment of agitation.</p> <p>Mild-Moderate: A study for the treatment of mild to moderate Alzheimer's disease.</p> <p style="text-align: center;"><i>For more information call 888-619-7272 or visit www.synergyresearchcenters.com</i></p>
<p>*Pacific Research Network</p> <p>3003 Fourth Ave, San Diego 92103 16766 Bernardo Center Dr, Ste 102, San Diego, 92128</p>	<p>Pacific Research Network (PRN) is a clinical research facility that specializes in examining new, investigational medications for the treatment of Alzheimer's disease. With over 250 clinical research trials completed over the last 35 years, we are still looking for answers. If you or someone you know is interested in participating in a clinical research study or would like a no-cost memory exam, we are currently looking for volunteers for six Alzheimer's disease trials.</p> <p style="text-align: center;"><i>For more information call 619-294-4302 or visit www.PRNSD.com</i></p>
<p>*Excell Research</p> <p>3998 Vista Way, Ste 100 Oceanside, 92056</p>	<p>Study for individuals with mild to moderate Alzheimer's disease who have been on a stable dose of 10mg of Donepezil.</p> <p>Study for individuals with Early Onset Alzheimer's disease (or individuals suffering from memory problems but without a diagnosis of Alzheimer's).</p> <p>Study for individuals with mild cognitive impairment</p> <p>Study for adults with disruptive behavior due to Alzheimer's (i.e. verbal outbursts, pacing, repetition, irritable)</p> <p style="text-align: center;"><i>For more information call 760-758-2222 or visit www.excellresearch.com</i></p>

Research Institution	Current Studies Enrolling Participants
<p>The Research Center of Southern California</p> <p>6010 Hidden Valley Rd., Ste 200 Carlsbad, 92011</p>	<p>Starbeam Study: This study evaluates a potential new treatment for mild-to-moderate Alzheimer’s disease. Participants may receive an investigational treatment, designed to help improve memory, thinking and reasoning.</p> <p><i>For more information call 760-732-0557 or visit www.neurocenter.com</i></p>
<p>UC San Diego Shiley-Marcos Alzheimer’s Disease Research Center</p> <p>9444 Medical Center Drive La Jolla, 92037</p>	<p>A4: Anti-Amyloid in Asymptomatic AD: This trial will assess solanezumab (an antibody that helps the body rid the brain of beta amyloid) on persons with no symptoms of Alzheimer’s.</p> <p>Cognitive Aging Longitudinal Study: The purpose of this study is to learn how the brain changes as we age. This is an observational study with no medication. It involves behavioral, medical and cognitive data collection and testing, as well as a neurologic exam. For individuals over the age of 65, with or without a diagnosis of dementia.</p> <p>EMERGE - Biogen (BIIB037): This study will evaluate the efficacy and safety of Aducanumab (BIIB037) in persons with early Alzheimer’s disease. This drug is being evaluated to determine whether it can remove the amyloid plaques and slow the progression of symptoms in early Alzheimer’s.</p> <p><i>For more information call 858-822-4800 or visit www.adrc.ucsd.edu</i></p>
<p>UCSD Department of Psychiatry</p>	<p>Alzheimer’s Caregiver Study: This study investigates whether providing caregivers with coping tools will lower physiological markers related to heart disease. All study visits conducted in-home. <i>For information call 858-534-9479</i></p> <p>Mild Cognitive Impairment: The purpose of this study is to see if walking and/or computer cognitive training has a benefit on a person’s cognitive (mental) status. <i>For more information call 858-642-6375</i></p>
