

Alzheimer's Research and Clinical Trials

A worldwide quest is under way to find treatments to stop, slow and even prevent Alzheimer's disease – much of that work happening right here in San Diego. Volunteering for a clinical trial is one of the best things you can do to help support research! For more information, contact the research institution or call Alzheimer's San Diego at 858-492-4400.

Research Institution	Current Studies Enrolling Participants <i>(as of 11/14/17)</i>
<p>*Sharp Healthcare Clinical Research</p> <p>7850 Vista Hill Ave San Diego, 92123</p> <p><i>For more information call 858-836-8350 or visit www.sharp.com/clinicaltrials</i></p>	<p>Early Study: Study for individuals who are at risk of developing Alzheimer's disease (family history) but currently have no symptoms.</p> <p>ReCOGNITION Study: Investigation of the drug Piromelantine to improve sleep, improve memory and limit the effects of Alzheimer's.</p> <p>Navigate Study: Study of an investigational drug on the progression of Alzheimer's</p> <p>Daybreak Study: Study of an investigational drug on the progression of Alzheimer's individuals who are asymptomatic and at risk for developing Alzheimer's dementia</p> <p>CREAD 2 Study: Study of a monoclonal antibody on the accumulation of amyloid protein in the brain and delay of disease progression in adults with mild Alzheimer's</p> <p>Mission Study: Study of an investigational drug on the progression of Alzheimer's</p>
<p>*Pacific Research Network</p> <p>San Diego, 92103 or Rancho Bernardo, 92128</p> <p><i>For more information call 619-294-4302 or visit www.PRNSD.com</i></p>	<p>Pacific Research Network (PRN) is a clinical research facility that specializes in examining new, investigational medications for the treatment of Alzheimer's disease. With over 250 clinical research trials completed over the last 35 years, we are still looking for answers. If you or someone you know is interested in participating in a clinical research study or would like a no-cost memory exam, we are currently looking for volunteers for multiple Alzheimer's disease trials.</p>
<p>*Excell Research</p> <p>3998 Vista Way, Ste 100 Oceanside, 92056</p> <p><i>For more information call 760-758-2222 or visit www.excellresearch.com</i></p>	<p>Biogen – Study for individuals with Early Onset Alzheimer's disease (or individuals suffering from memory problems but without a diagnosis of Alzheimer's).</p> <p>Eisai – Study is for individuals experiencing mild cognitive impairment, memory problems, and/or trouble with thinking.</p> <p>IntraCellular Technology – Study is for individuals with agitated behaviors due to Alzheimer's (i.e. verbal outbursts, pacing, repetition, irritable, etc).</p>
<p>UC San Diego Shiley-Marcos Alzheimer's Disease Research Center</p> <p>9444 Medical Center Drive La Jolla, 92037</p> <p><i>For more information call 858-822-4800 or visit www.adrc.ucsd.edu</i></p>	<p>The UC San Diego, Shiley-Marcos Alzheimer's Disease Research Center (SMARDC) is the only university-based, federally funded, Alzheimer's disease research center in San Diego. The SMADRC is currently enrolling participants for a variety of studies including those that test investigational medications and diagnostic methods, long-term observational studies without medication and more. Studies are open to adults with a diagnosis of MCI or dementia, have a family history of Alzheimer's as well as those without any memory problems.</p> <p>The SMARDC also offers no-cost memory screening and quality of life programs to complement our research efforts. <i>Hablamos Español!</i></p>

Research Institution	Current Studies Enrolling Participants
<p>The Research Center of So. California</p> <p>6010 Hidden Valley Rd., Ste 200 Carlsbad, 92011</p> <p><i>For more information call 760-732-0557 or visit www.neurocenter.com</i></p>	<p>Daybreak Study: Study of an investigational drug on the progression of Alzheimer's.</p> <p>CREAD Study: Evaluate the effects of investigational drug Crenezumab in people with early to mild Alzheimer's disease.</p>
<p>Synergy Research Centers</p> <p>Lemon Grove, 91945 or National City, 91950</p> <p><i>For more info call 888-619-7272 or www.synergyresearchcenters.com</i></p>	<p>Alzheimer's and Agitation: A study for people with Alzheimer's who have agitation. Participants can remain on current Alzheimer's medication and will be given the study medication or placebo for treatment of agitation.</p> <p>Mild-Moderate: A study for the treatment of mild to moderate Alzheimer's disease.</p>
<p>UCSD Department of Psychiatry</p> <p><i>For more information call 858-642-6375</i></p>	<p>Alzheimer's Caregiver Study: This study investigates whether providing caregivers with coping tools will lower physiological markers related to heart disease. All study visits conducted in-home. <i>For information call 858-534-9479</i></p> <p>Mild Cognitive Impairment: This study compares the impact of a walking program, computer-based cognitive training and the combination of the two on memory, cognition and quality of life in adults with MCI.</p> <p>Mild Cognitive Impairment: The purpose of this study is to see if walking and/or computer cognitive training has a benefit on a person's cognitive (mental) status.</p>
<p>Advanced Neurobehavioral Health</p> <p>15644 Pomerado Road, Suite 305 Poway, CA 92064</p> <p><i>For more information call 619-798-6048 or www.anhsocal.com</i></p>	<p>A study for people with Alzheimer's disease, Mild Cognitive Impairment, Parkinson's disease dementia, or Dementia with Lewy Bodies, investigating the relationship between sleep disturbances and cognitive decline, in hopes of improving early detection of serious cognitive decline.</p> <p>We are also examining the effectiveness of a computer program to help distinguish between disorders. No medication or longitudinal follow-up is required.</p>
<p>PCND Neuroscience Research Institute</p> <p>15644 Pomerado Road, Suite 401 Poway, CA 92064</p> <p><i>For more information call 858-674-1289 or pcndneurology.com</i></p>	<p>XanAdu: The purpose of this study is to see if the investigational drug Xanamem will inhibit the conversion of cortisone to cortisol in the hippocampus. For people with MCI or early stage dementia.</p>
