

Alzheimer's San Diego

Dementia Research & Clinical Trials

A worldwide quest is underway to find treatments to stop, slow, and even prevent Alzheimer's disease and related dementias. Much of that work happening right here in San Diego County. Volunteering for a study is one of the best ways you can help find a cure! **For more information, contact the research institution directly or call Alzheimer's San Diego at 858.492.4400.**

Thank you to our valued clinical trials partners, featured below. Their support keeps our services free to the community! These studies are currently enrolling participants (as of November 2023) but are subject to change frequently. Contact the research institutions for the latest opportunities.

Sharp Neurocognitive Research Center

8010 Frost Street, Suite 400, SD 92123

- **AHEAD study:** The study will test the effectiveness of Lecanemab (Leqembi) in people who are at an increased risk of developing Alzheimer's based on family history, age group, and elevated amyloid, the protein associated with Alzheimer's disease.
- **UCB0107 study:** The study will investigate the effectiveness of an investigational drug UCB0107 in people with early signs of MCI due to Alzheimer's or mild Alzheimer's.
- **EVOKE study:** The study will test the effectiveness of semaglutide, a medication used to treat diabetes in improving symptoms of early Alzheimer's.
- **CVL-871-2001 study:** This study will test the effectiveness of an investigational drug CVL-871 in treating "dementia-related apathy" in individuals with mild to moderate dementia.

Please note: Insurance is not required for study participation. Participants and study partners may be compensated for time and travel.

Dementia Research & Clinical Trials

- **INVOKE-2 study:** This study will test the benefits and side effects of an investigational drug, AL002, in people with early Alzheimer's disease. [Clinical Trial Site in Portland, Oregon] — Please note: You must have a study partner who agrees to accompany you in order to participate in the study. There is no cost for study-related treatments, testing, or procedures for eligible participants.

Alzheimer's Therapeutic Research Institute (Keck School of Medicine of USC)

858-964-4644 | www.keck.usc.edu/atri

The ATRI institute seeks volunteers for their Alzheimer Prevention Trials (APT) Webstudy whose purpose is to develop a large online group of individuals who may be at higher risk for developing Alzheimer's dementia, and who may be interested in participating in a prevention trial.

Advanced Brain Monitoring

To schedule a visit or request more information call: (760) 720-0099 ext. 6011

- Looking for patients diagnosed with: Alzheimer's, Parkinson's, or Lewy Body Dementia, or Mild Cognitive Impairment 40-95 years old to participate in a computer-based study.
- Study participants will complete a series of computer-based memory and attention tasks. The aim of the study is to help develop biomarkers that may be used by pharmaceutical companies in clinical trials to monitor the effectiveness of experimental drugs on neurodegenerative diseases
